Sewage Pump**

KISHOR[®]

DRY PIT NON - CLOG PUMP - VERTICAL DIRECT DRIVE

TYPE - DVD

**FOR RAW SEWAGE, EFFLUENTS
& STORM WATER**

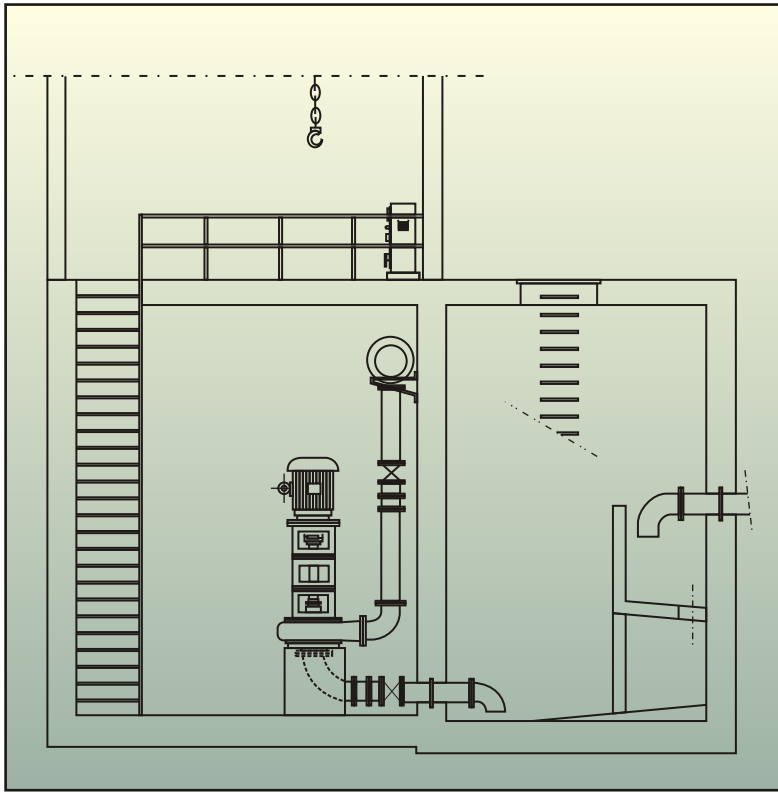

APPLICATION

- Raw Municipal Sewage
- Large & Small Pumping Stations
- Storm Water
- Mines Dewatering
- Construction & Drainage Sites
- Industrial Waste Water & Effluents

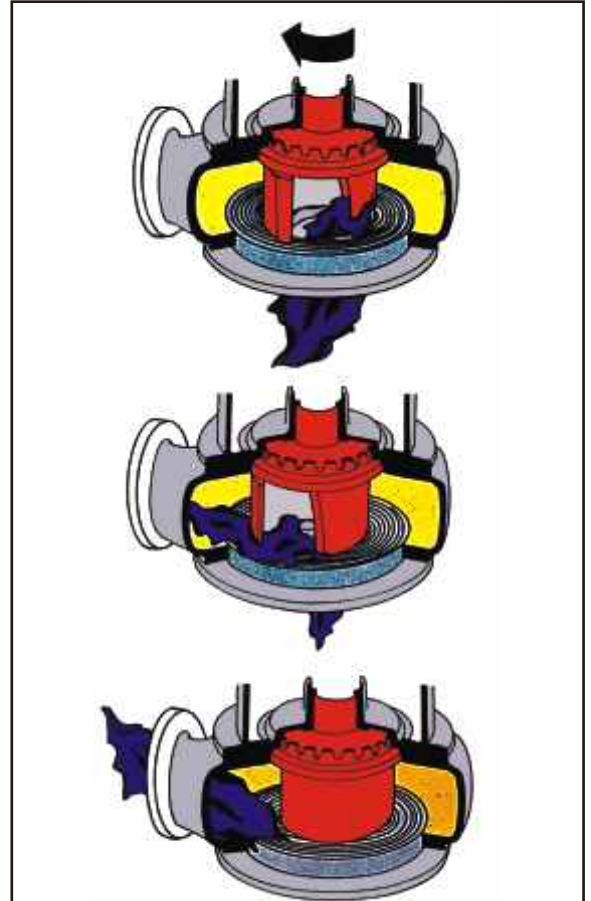

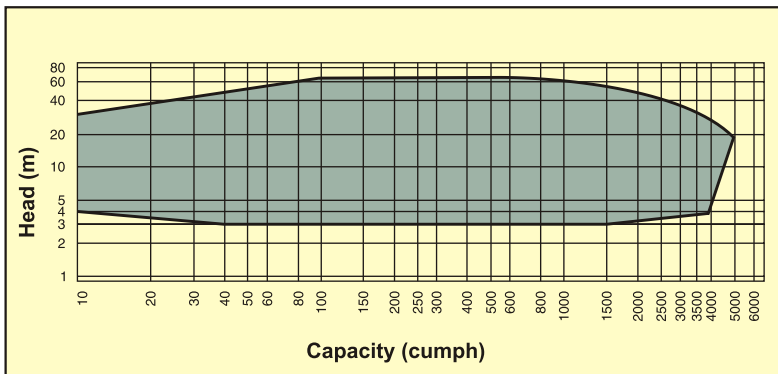

DESIGN FEATURES

- Back pull-out construction
- All joints spigot-socket
- Easy impeller cleaning & inspection
- Easy to assemble
- No alignment problem
- Sturdy design
- Space saving
- Non-clog impeller
- Safe location of motor
- Low transmission losses
- Easy to maintain

Quality brings us together

Flow Rate	Upto 5,000 cumph
Head	Upto 75 Meters
Power	300 kW (400 HP)
Delivery Nozzle	Upto 600 mm NB

CONTRA BLOCK SYSTEM

KISHOR DVD pumps are provided with the Contra Block System which very effectively handles fibrous and plastic materials.

In the Contra Block System, a semi-open type of impeller, either single vane or two vane, is provided. It runs opposite to the suction plate with spiral groove running outwards. Any fibrous material or plastic moving freely inside the impeller is forced out straightway. Further, in the event of such material getting caught between the edges of the vanes and the opposite plate, they are smoothly guided due to the spiral groove. Thus, within a few revolutions, the entire fibrous material is forced out.

Due to constant Research & Development, the above information is subject to change without notice. Colours do not signify materials.
